Promotional Copy: Student Recruitment

Applications for the free [In2STEM programme](#) across the UK are now open!

[Students can apply here](#) - the deadline is 22 December 2023.

- The programme is for 16-19 year old students (Year12/S5/S6/college) from less advantaged backgrounds interested in exploring a career in STEM.
- It takes place between 22 July and 23 August 2024 and consists of work experience placements, online workshops and competitions, and events.
- The placements take place over 1 or 2 weeks during the programme period at local STEM workplaces and universities.

For more information, see our [website](#), [eligibility criteria](#) and [FAQs](#).

For an informal discussion about the programme and supporting the young people you work with to apply, please email the In2STEM team at students@in2scienceuk.org.

Promotional Copy: Volunteer Recruitment

Applications to volunteer on the [In2STEM programme](#) across the UK are now open!

We're looking for amazing researchers and STEM professionals who can share their insight and expertise with Year 12 and S5/S6 students from low socioeconomic backgrounds, by:

- Hosting students for one or two week summer work experience placements, as part of the In2STEM in-person programme
- Supporting groups of two to three students through two online mentoring sessions, as part of a small but growing In2STEM Online programme

Key information:

- Apply by completing our [Application Form](#) by 28 January 2024.
- Work placements take place for 1 or 2 weeks between 22 July and 23 August 2024, based on your preference and availability
- You can apply as an individual, co-host with colleagues or as a group (eg, on a department level)
- We support you to plan and host your placement through online training, an extensive host guide, example timetables and activities, and public engagement workshops

For more information, visit our [website](#) and [FAQs](#). For an informal discussion about volunteering on the programme, please email Neda at neda@in2scienceuk.org.
