Subject: In2STEM 2026: Shape a young person's STEM future

Dear {{First Name}},

Help inspire the next generation of STEM professionals by hosting a placement on the 2026 In2STEM programme.

[In2STEM](#) developed by In2scienceUK, is a summer programme supporting young people from low socioeconomic backgrounds and underrepresented groups to access insight and knowledge through in-person work experience and live online workshops.

We are looking for passionate **STEM professionals** to host a **1-2 week summer placement** as part of the 2026 In2STEM programme.

If you're a STEM professional passionate about widening participation, you can support our mission by volunteering as a Placement Host.

Become a Placement Host:

- Host a 1-2 week summer placement between 20 July and 21 August 2026, for a small group of year 12 or S5/6 students (dependent on your capacity).
- Provide insight into working in STEM, help participants gain crucial skills, and inspire the next generation.
- Don't worry - **you don't have to be available for the whole summer!** You can let us know the week(s) you're available and you'll be matched to students with the same availability.
- You can also apply with co-hosts or as a group for support.
- We support you to plan and host your placement through online training, an extensive host guide, example timetables, activities and a dedicated team of staff.

[Apply today](#)

Find out more about volunteering on the 2026 In2STEM programme by attending one of our upcoming [volunteer information sessions](#) and reading through the attached PDF guide.

If you have any questions or need further help, please contact the In2STEM team via STEM@in2scienceuk.org or 0808 175 6766.

Best wishes,
