

Please note: These are examples of each subject. Every placement will vary and we can't guarantee what each placement would involve. Specifics of what your placement would entail would be sent to you in your placement offer if you're successful.

Medicine

Focus: Improving diagnosis, treatment, and patient outcomes through applied or translational research — bridging lab discoveries and clinical practice.

Example keywords that may link:

- Anatomy
- Surgery
- Paediatrics
- Cardiology

Biomedical Science

Focus: Understanding the biological mechanisms of health and disease — primarily lab- and data-based, not directly involving patients.

Example keywords that may link:

- Molecular biology
- Cell biology
- Genetics
- Immunology

Healthcare

Focus: How care is organised, delivered, and improved — including patient experience, workforce development, and public health.

Example keywords that may link:

- Nursing
- Midwifery
- Public Health
- Clinical Trials
